

Tough Smart Very hard to kill

Maj is marvelous. She also carries an alien infection that promises mankind an end to sickness and death.

All the aliens ask in return is our help escaping from a dimensional prison where they have been trapped since the earliest days of life on earth.

The Shadow Makers, who like to call themselves “Light Holders”, are not as benevolent as they may seem. Their escape will threaten not just humanity, but the entire galaxy including countless life forms that exist around and in between the stars.

In this book we meet Maj, her friends (including a reptilian named Drakko) and some of her ancestors as she discovers not just the alien purpose for which she was born but her true destiny.

Maj and her unlikely companions will be all that stands in the way of the evil and greedy Shadow Makers.

May God help us all.
